

E3 MANAGEMENT CONSULTING, LLC

In the crowded world of consulting and professional services, having a trusted partner can be the difference-maker in your success. Disillusioned with the drumbeat in larger consulting firms of, “revenue-first, clients-second,” E3 was founded under the premise that effectiveness and efficiency are complementary, not competing organizational states. We choose our projects carefully, because we only take on opportunities that we believe we can win.

## Experts in Effectiveness & Efficiency...E3.

E3 Management Consulting (E3) is a certified Economically Disadvantaged Women Owned Small Business (EDWOSB), WOSB, and state of Maryland Small & Disadvantaged Business Enterprise (SBE/DBE). We serve the federal government and its partners with a singular, simple mission: **Experts in Effectiveness and Efficiency = E3**. Our teams have captured billions in revenue for our clients, and over \$1 Trillion in IDIQs. Examples of our wins for clients include:

- ◇ **\$5 Billion IDIQ Capture.** We understand compliance and how to work opportunities to success...for months, sometimes years.
- ◇ **MACs/GWACs/Contract Vehicles.** We on-ramp your company, help you navigate the complexities, and drive task orders to you.
- ◇ **\$25 Million Single Award BPA.** We’ve helped small to mid-size contractors win work in agencies they’ve never touched before.
- ◇ **\$4 Million 8(A) Direct Award.** You worked hard to get that socioeconomic status. Let us put it to work for you.

### Why E3?

- ⇒ **No Learning Curve.** We’ve successfully won government contracts for clients and ourselves going on decades, so we’ll hit the ground running regardless of your product, service, or vertical.
- ⇒ **Need Trusted Partners?** We have a huge cache of vetted partners in every socioeconomic status to round out your team.
- ⇒ **As Much or As Little As You Need.** We own your practice or we work alongside your program managers and leadership.
- ⇒ **We Understand Government.** We don’t need a glossary to communicate with you or your clients.
- ⇒ **CRM Integration...Done.** Need a way to view our progress? We work within our CRM (or yours) and provide analytics, reports, and weekly updates on what we’re doing for you.
- ⇒ **Product, Service, and Everything in Between.** We’ve captured opportunities ranging from enterprise-wide cybersecurity frameworks, telecommunications; wireless communications, information technology, financial management, acquisition, human capital, accounting firms, and much, much more.
- ⇒ **Still Not Sure?** It can feel strange allowing a consultant into your business. Not to worry: we operate under strict NDAs.

# We Know Federal...

**Case Study #1:** A fortune 15 firm needed strategic business development, capture management, and bid & proposal support for an estimated 135+ task orders slated to arrive off an already-won IDIQ. E3 led teams across 13 functional workstreams to manage the opportunity response, providing strategic oversight and direction to score the client highest according to the government's Section M evaluation criteria. E3 leads responses ranging from \$400 Million-\$3 Billion.

**Case Study #2:** A government contractor with annual revenues of \$35 Million was in need of additional support within their business development function. E3 assessed the organization, providing streamlining and workflow process automations where necessary. We created a pipeline worth of \$50 Billion, and managed the data and information of their customers. We led and won a \$25 Million IDIQ in a new customer agency within 4 months of our being contracted to support them. We then helped them hire and train permanent BD staff.

**Case Study #3:** A government contractor wanted to enter the federal market with no prior experience. We provided subject matter expertise in BD, capture, B&P, marketing, and a five year go-to market strategic plan with milestones. Following this plan, we captured a \$4M federal opportunity shortly after implementation.

# And we have the chops to back it up.
